Release Note - 24.09.1

Release Version Number: 24.09.1

Release Date (DD-MMM-YYYY): 22nd-Sep-2023

Product Name: Instasafe Secure Access (ISA)

Any Release Recommendations to End User or Customers: None

Bugs Fixed

1. **Duplicate Profile Name Issue When Admin Updates Subadmin Roles**

Admins are now unable to update a SubAdmin role with a duplicate profile name. If attempted, the user will receive the message: "Your company already has a similar role."

   Severity: Low

2. **InstaSafe Agent fails to connect after accepting Push Notification from InstaSafe Authenticator**

Users can now successfully connect to the agent after accepting a push notification from InstaSafe Authenticator. The "Secondary Authentication Failed as Server returned Error" message will no longer appear.

   Severity: High

3. **User Agent Downloads Page Search Box Not Functioning for a Sub-admin user**

When searching for a username, the search box dynamically filters and displays relevant results based on the entered input.

   Severity: Low

4. **Validation to prevent Creation of Duplicate Application Services**

Validation is now enforced when creating services. If a service name already exists, the error message "Application service name already used" will be displayed. Admins cannot create services with duplicate names, regardless of letter casing. This rule applies to both individual and bulk service creation.

   Severity: Low
