

Zero Trust Application Access Release Notes

This document is the release notes for InstaSafe Zero Trust Application Access (ZTAA) features to be released on 18th October 2025. This document contains changes to backend services, including performance optimizations, and messaging flexibility.

Major Enhancements

Component	Enhancements
Backend	- MongoDB/TOTP: Removed regex for TOTP Configuration Entity queries to fully leverage indexes, reducing CPU usage and database costs. OTPs, TOTP logins, and push notifications continue to work as-is.. - - SQS / RestSQS: Made RestSQS optional with intelligent fallback. Tenants can force SQS or RestSQS; otherwise, SQS is used in open internet and RestSQS in restricted environments.
